| | _____ | i. A 29-year-old female has severe abdominal pain; vital signs are stable. |
| | _____ | j. A 31-year-old conscious male has uncontrollable bleeding from an open head wound. |

Scenario

Your ski area is sponsoring a large rock concert on a hot and humid July evening. From the base you notice clouds off in the distance. All of a sudden, a microburst storm quickly passes over the concert position, and a bolt of lightning strikes in the middle of the concert crowd. You realize that some of the concert goers have been struck. You wait for this quick-moving storm to pass and for the scene to become safe. Grabbing a battery-operated bullhorn, you head into "ground zero" and take charge.

1. Your role in this situation is called _____.
 - a. Operations Chief.
 - b. Logistics Chief.
 - c. Planning Chief.
 - d. Incident Commander.

Using the bullhorn, you request that the uninjured head for the indoor lodges. The number of injured appears to be about 20 people. If the number had exceeded 100 and resulted from a criminal act, assistance would be provided by multiple agencies.

2. This type of command is called _____.
 - a. multi-response.
 - b. multi-organizational.
 - c. simplified.
 - d. unified.

From your position and using your portable radio, you organize the MCI team and call EMS and the local dispatcher, declaring the MCI and requesting help.
